Q1 Student

10 marks

Write a program to enter the mark of a student in four subjects. Then calculate the total and aggregate. Display the grade obtained by the student, if student scores an aggregate greater than 75% then grade is distinction

Your Code

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         int m1, m2, m3, m4;
8         System.out.println("Enter marks of 4 subjects: ");
9         m1 = sc.nextInt();
10        m2 = sc.nextInt();
11        m3 = sc.nextInt();
12        m4 = sc.nextInt();
13
14        int total = m1 + m2 + m3 + m4;
15        double aggregatePercent = (total * 100.0) / 400.0;
16
17        System.out.println("Total marks = " + total);
18        System.out.printf("Aggregate (%) = %.2f%%\n", aggregatePercent);
19
20        if (aggregatePercent > 75) {
21            System.out.println("Grade = Distinction");
22        } else {
23            System.out.println("Grade = Not Distinction");
24        }
25
26        sc.close();
27    }
28 }
```

Run Save

Input

78
87
88
89

Output

Enter marks of 4 subjects: Total
marks = 342
Aggregate (%) = 85.50%
Grade = Distinction

Q2 ATM

10 marks

Write a program to print the total amount available in the atm machine with the conditions applied total denominations are 2000, 500, 200, 100, 50. Get the denomination priority from the user and the total number of notes from the user to display the total available balance to the user

Your Code

```
1 import java.util.*;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         int[] denom = {2000, 500, 200, 100};
8         int[] counts = new int[4];
9
10        System.out.println("Enter the priority order (as 4 denominations):");
11        for (int i = 0; i < 4; i++) {
12            denom[i] = sc.nextInt();
13        }
14
15        System.out.println("Enter number of notes for each denomination");
16        for (int i = 0; i < 4; i++) {
17            System.out.print("Enter number of notes for " + denom[i] + ": ");
18            counts[i] = sc.nextInt();
19        }
20
21        int total = 0;
22        for (int i = 0; i < 4; i++) {
23            total += denom[i] * counts[i];
24        }
25
26        System.out.println("Total amount available in ATM: " + total);
27        sc.close();
28    }
29 }
```

Run Save

Input

2000 500 200 100
5 10 2 1

Output

Enter the priority order (as 4 denominations): Enter number of notes for each denomination in the same priority order:
Notes for 2000: Notes for 500:
Notes for 200: Notes for 100:

Q2
ATM
10 marks

Q3
TAX
10 marks

Q4
BONUS
10 marks

4/4 answered

Q3 TAX10 marks

Write a program to calculate tax given following condition :
If income is less than or equal to 150000 then no tax
If taxable income is 150001 – 300000 the charge 10% tax
If taxable income is 300001 – 500000 the charge 20% tax
If taxable income is above 500001 the charge 30% tax

Your Code

```
1 import java.util.Scanner;
2
3 public class TaxCalculator {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         System.out.print("Enter income: ");
8         double income = sc.nextDouble();
9
10        double tax;
11
12        if (income <= 150000) {
13            tax = 0; // as per "then to tax" (no tax mentioned for <=)
14        } else if (income <= 300000) {
15            tax = 0.10 * income;
16        } else if (income <= 500000) {
17            tax = 0.20 * income;
18        } else {
19            tax = 0.30 * income;
20        }
21
22        System.out.println("Tax = " + tax);
23        sc.close();
24    }
25 }
```

Run Save

Input

400000

Output

Enter income: Tax = 110000.0

10 marks

Q4
BONUS
10 marks

4/4 answered

Q4 BONUS10 marks

a bonus 5% salary is given to grade A workers and 10% bonus to Grade B, write a program to enter salary and grade of employee, if salary less than employee gets an extra 2% bonus on salary. Calculate the bonus that has to be given to the employee and print the salary that the employee will get

Your Code

```
1 import java.util.Scanner;
2
3 public class BonusProgram {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         double salary;
8         char grade;
9
10        System.out.print("Enter salary: ");
11        salary = sc.nextDouble();
12
13        System.out.print("Enter grade (A/B): ");
14        grade = sc.next().toUpperCase().charAt(0);
15
16        double bonusRate = 0.0;
17        if (grade == "A") {
18            bonusRate = 0.05;
19        } else if (grade == "B") {
20            bonusRate = 0.10;
21        } else {
22            System.out.println("Invalid grade. Please enter A or B.");
23            sc.close();
24            return;
25        }
26
27        double extraBonusRate = 0.0;
28        if (salary < 50000) {
29            extraBonusRate = 0.02;
30        }
31
32        double totalBonus = salary * (bonusRate + extraBonusRate);
33        double finalSalary = salary + totalBonus;
34
35        System.out.println("Bonus to be given: " + totalBonus);
36        System.out.println("Salary after bonus: " + finalSalary);
37
38        sc.close();
39    }
40 }
```

Run Save

Input

400000
A

Output

Enter salary: Enter grade (A/B):
Bonus to be given: 20000.0
Salary after bonus: 420000.0
